

Do you want to know more about Dementia?

Find out more about the latest developments in research on Alzheimer's disease and related dementias in Oxford. Free for all members of the public.

Saturday 22nd March 2014

10.00 am – 1.00 pm

· Tea, coffee and cake provided · Displays and information booths ·

John Radcliffe Hospital, Headington, Oxford
Lecture Theatre 2, Academic Centre

What can a dish of patient-derived stem cells tell us about dementia? What is Frontotemporal Dementia? What is the relationship between brain structure and function - particularly in language and social cognition? Can rehabilitation and physical activity help in brain recovery?

Hear about the interesting research and innovation projects that are taking place in Thames Valley region.

Dr Richard Wade-Martins

Alzheimer's Research UK Oxford Network

Dr Chris Butler

Nuffield Department of Clinical Neurosciences
