

Date and Time	Speaker and Title	Venue
11 January Tuesday 4pm	Professor Tipu Aziz Oxford Functional Neurosurgery, University of Oxford Pedunculopontine nucleus stimulation for the treatment of drug resistant freezing and falls in Parkinson's Disease	Lecture Theatre Dept of Pharmacology
1 February Tuesday 4pm	Dr Maeve Caldwell School of Clinical Sciences, University of Bristol Stem cell therapy for Parkinson's Disease, lessons from the developing brain	Lecture Theatre Le Gros Clark Building
1 March Tuesday 4pm	Professor Paul Matthews GSK Clinical Imaging Centre, Imperial College, London The Challenge of Imaging Neurodegeneration in Parkinson's Disease	Lecture Theatre Dept of Pharmacology
29 March Tuesday 4pm	Professor Howard Federoff Georgetown University Medical Center Systems Neuromedicine & Parkinson's Disease	Lecture Theatre Dept of Pharmacology
3 May Tuesday 4pm	Professor Margaret Rice Department of Neurosurgery, New York University School of Medicine How H²O² mediates and modulates neurotransmission in the basal ganglia	Lecture Theatre Dept of Pharmacology
7 June Tuesday 4pm	Mr Alex Green Oxford Functional Neurosurgery Pendunculopontine nucleus stimulation for the treatment of drug resistant freezing and falls in Parkinson's Disease	Lecture Theatre Dept of Pharmacology
5 July Tuesday 4pm	Professor Yoav Ben-Shlomo Department of Social Medicine, University of Bristol Epidemiological insights into the understanding of Parkinson's Disease	Lecture Theatre Dept of Pharmacology
14 September Wednesday 4pm	Professor Alfred Goldberg Department of Cell Biology, Harvard University Functions of the Proteasome: from clearing misfolded proteins to cancer therapy	Lecture Theatre Le Gros Clark Building
4 October Tuesday 4pm	Dr Vania Broccoli Stem Cells and Neurogenesis Unit, San Raffaele Scientific Institute, Milan Generating iDA neuronal cells by direct reprogramming of mouse and human fibroblasts without pluripotent cell intermediates	Lecture Theatre Le Gros Clark Building

Oxford Parkinson's Disease Centre Seminar Series 2011

Date and Time	Speaker and Title	Venue
1 November Tuesday 4pm	Dr Roger Barker Department of Clinical Neurosciences, University of Cambridge The Heterogeneity of Parkinson's Disease – its basis and therapeutic implications	Lecture Theatre Le Gros Clark Building
29 November Tuesday 4pm	Professor John Hardy Department of Neurology, Reta Lila Weston Institute of Neurological Studies Genetic analysis of neurodegeneration	Library Sherrington Building
